

This proposed legislation is not in my estimation in the best interests of the public, and I firmly believe that if the public had a chance to vote on it, they would resoundingly turn it down. The airwaves belong to us the people not to special business interests, and as the safekeeper of these airwaves for the people, you the FCC should be looking out for our best interests, not the interests of the deep pocketed money crowd and their lobbyists.

Please delay this rush to mandate, in the interest of all the people.

Thanks

Mark W. McCann
